Kelompok 04

Name and NIM of group members

- Golden Christian G. (2341720216)
- M. Atho'illah M. (2341720210)
- M. Farhan Fahraby (2341720188)
- Yuma Akhunza K.P (2341720259)

Project theme

- Sistem Informasi Bebas Tanggungan Tugas Akhir (TA)

Project Description

- This project aims to develop a web-based information system that helps students, lecturers, and campus administration in processing Final Assignment (TA) release letters. This system will record and verify all academic and non-academic obligations that must be fulfilled by students before they can complete their studies. This system ensures that students have completed all obligations before graduating or receiving a diploma. With this system, the administrative process becomes more efficient, transparent, and can be accessed online.

Users of System

- Admin
- Mahasiswa

System Features

Student Dashboard:

- Displaying the fulfillment status of TA liabilities.
- Notifications regarding outstanding liabilities.
- Online application for a letter of exemption from liabilities.

Dependent Verification:

- Automatic verification from various related units (library, laboratory, finance, etc.).
- Manual confirmation by admin for special dependants.

User Management:

- Different access rights for students, lecturers, and admins.
- Features for admin user data management.

Reporting and Statistics:

- Daily, weekly, and monthly reports on the number of students who have completed their obligations.
- Statistics on fulfillment of obligations from various units.

Notifications and Reminders:

- Email and SMS notifications to remind students about dependent status.

- Reminders of document collection schedules and other requirements.
